

**CORSAIR's NEW
 Sprint 750 MK II**

2012 Specifications

"I love the huge, open cockpit on the Sprint 750 MK I. But can I have the DASH's floats with higher buoyancy?"

Yes you can! Welcome to the **NEW** Corsair Sprint 750 MK II.

The first thing you will notice on the MK II is the deck which has been totally redesigned, its styling is sleek, fresh and modern. In addition to using the bigger floats of the DASH 750, the MK II also uses the DASH's, stronger beams and its hull and rig. You'll easily skip across the water.

Then, you will notice the Day Sailor come out in you: *"I bet my Sprint 750 MK II could beat the DASH 750..."*

As with all our trimarans, the Sprint 750 MK II delivers on "Corsair's Critical Criteria"; namely, safety through structural integrity. Its ease of trailerability is made possible by the simplicity of the mechanisms to fold the floats and raise/lower the mast. Trailerability means more sailing opportunities for day sailing and racing. With the family. With friends. *Can you afford to not own the new Sprint 750 MK II?*

The base boat includes the following features:

- Huge cockpit and functional cabin with one double bunk. Space for a porta-potty
- Beige Interior carpet liner
- Rotating aluminum wing mast with synthetic shrouds and bobstay, main, jib, screecher and spinnaker halyards.
